

Welcome to Re Caribe 2008

From:

Wade Salvage Inc, trading as

Wade Environmental, USA

Wade Environmental: A Full Service Company

- Management of all types of waste and recyclables
- Packing, Shipping, Ocean & Highway Freight options
- Import & Export experience
- Over 60 years of scrap handling
- Specialty & Universal Waste management

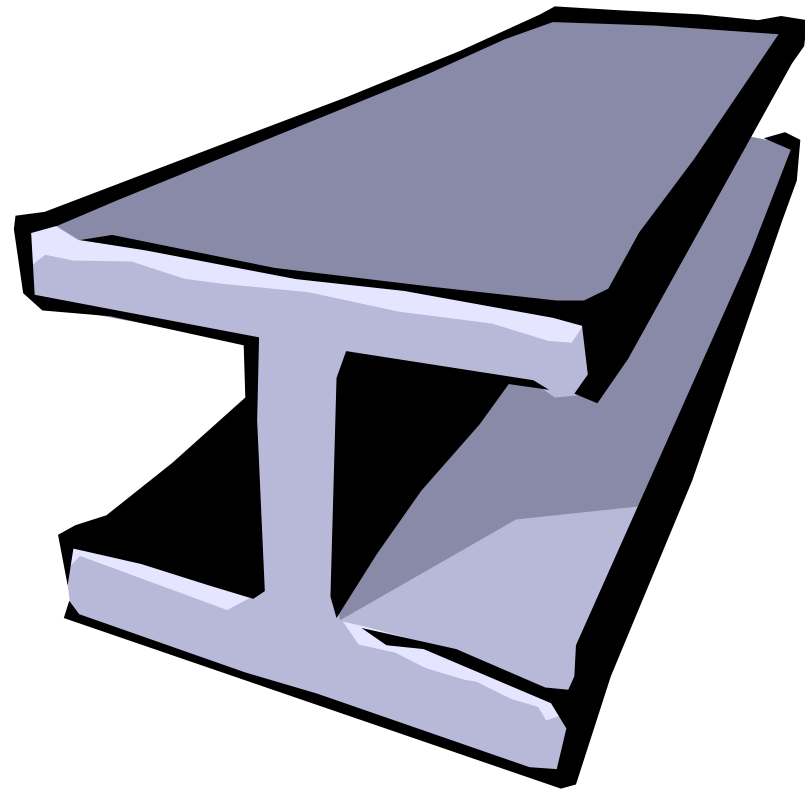

Wade Environmental Services Scope:

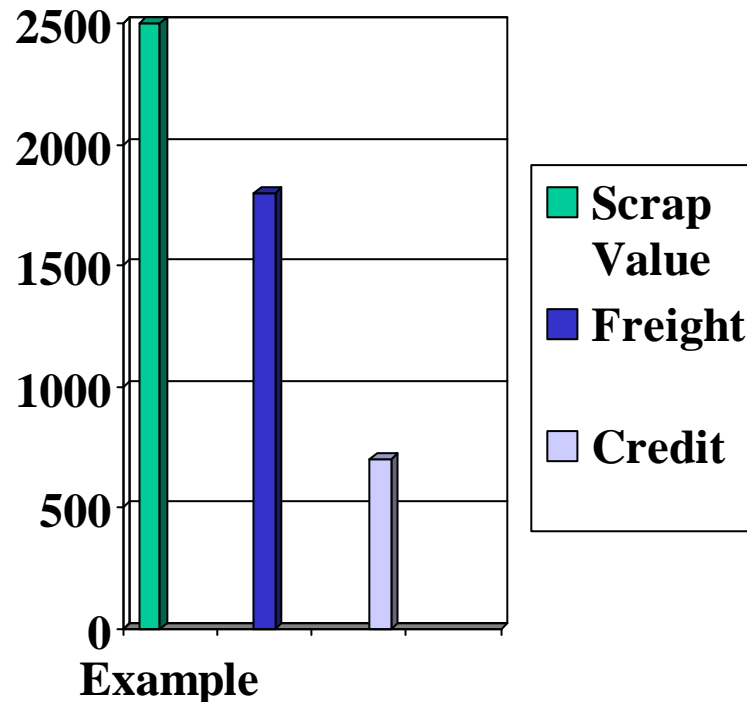

- Operating Four Locations on the East Coast of US
- Consultation, Packaging, & Transportation are available/arranged.
- Scrap Metal Recycling; ferrous & non-ferrous- all types
- Lead-Acid Battery & All other types of battery recycling
- Fluorescent and Other Lamp type recycling
- Tire Recycling- for all sizes and applications
- Solid Waste management; US container service
- Household Hazardous & Hazardous Waste management
- Electronic/ E-Waste scrap recycling

SCRAP METAL Recycling

- All types of metal accepted; ferrous- iron, steel, cast; non-ferrous- copper, brass, aluminum
- Vehicle processing
- Site Demolition & Cleanup; Metal structures/debris removed
- Compressed Gas cylinder recovery & recycling

Metal Recycling Options

- On-site Assessment of Scrap Materials
- 20 & 40 Foot Overseas containers (availability depends on local port of loading)
- Value for Scrap used to offset Freight costs
- Container Loading Assistance & Consultation

Tire Management & Recycling

- Tires Accepted with & without rim
- Auto & Light Truck sizes up to 16.5” rim size
- Truck & Trailer sizes up to 22.5” rims size
- Agricultural & heavy equipment, any size
- Tires are trans-shipped to an approved tire shredder- no landfilling of tires
- Surplus tires may be accepted for resale
- Transportation and loading services are available

Additional Considerations

- Recycling Fees based on tire size
- Mixed loads also accepted
- Tires should be stacked to maximize container space
- Save valuable local landfill space by removing tires from waste stream
- Added benefit of all tires being recycled

Electronic / E-Waste Scrap Recycling

- All types of electronics accepted
- Non-working units/ components/ parts/ obsolete all acceptable
- Cathode Ray Tubes(CRTs) and Flat-Panels
- No quantity minimum or maximum
- Sorted/straight or mixed loads

E-waste Recycling Benefits

- On-site sorting & packing consulting available
- Fees or Credits vary with material
- Recycling reduces toxins released into the environment
- PCs contain lead, mercury, cadmium, and other harmful heavy metals
- Estimated quantities and types of materials helpful in providing the best service

Analog to Digital Transition

- TV broadcast transition
- Scheduled for February 2009
- Potential for flood of “obsolete” TV units into waste stream
- Several Options available
- Converter units may prolong TV useful life
- Alternate non-digital uses for TVs
- Scrapping of TVs
 - Would save landfill space
 - Conserve Natural Resources

Cell Phone Recycling

- Cell & Mobile Phones easy to manage
- Separate battery from phone for optimum recycling
- Recover various metals & plastic
- Phone Accessories also can be recycled

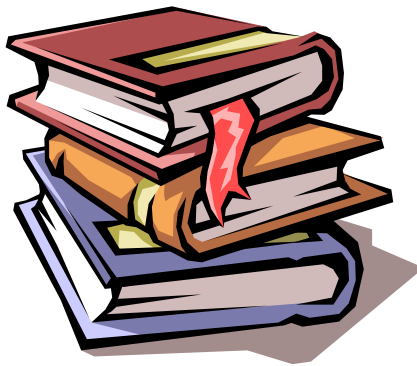

International Services

- Hazardous & Non-Hazardous Materials Import-Export
- On-site Consulting services, at your location
- Surplus & Waste Shipping
- Intermodal Interchange at the Port of NY & NY; Voigt Maritime, Salem, NJ; other ports also available
- We maintain our own import bond and US Customs Broker
